SUMMARY

With over 7 years of experience in software development, I have a proven track record in building robust SaaS products across diverse industries, mastering both backend and frontend technologies like Laravel, React, MySQL, and GCP. I'm well-versed in the full development lifecycle from design to deployment and have effectively managed projects to meet high performance and security standards.

In addition to my technical work, I've taken on leadership roles, such as task distribution with Jira and Google Tasks among team members, client coordination, product training, and troubleshooting network devices and servers for complex infrastructures.

Now, I'm eager to specialize in Cybersecurity, aiming to secure digital systems and data in today's evolving landscape. Combining my software background with cybersecurity expertise, I plan to deliver holistic, secure, and innovative solutions.

SKILLS

Programming Languages and Code skills:

- PHP, JavaScript, TypeScript, HTML, SASS/CSS, SQL, JSX

Frameworks & Libraries:

- Front-End: ReactJS, React Native, jQuery
- Back-End: Laravel, [Node.js/Express](https://nodejs.org/en/), NextJS, Django, Flask, Tkinter
- Bootstrap, Prime React, Ant Design, Tailwind CSS

CRM & CMS Platforms:

- WordPress, Funnelflex, Zoho Bigin, OctoberCMS, TastyIgniter

Databases:

- MySQL, Firebase/Firestore

Tools & Technologies:

- Git (Version Control), Debian-based OS, PowerShell, Bash, Jira, and Slack

Networking & Infrastructure:

- Skilled in troubleshooting and maintaining network devices in high-rise buildings, including systems used in elevator and door access controls for condominiums

Additional Skills:

- Strong command over terminal operations, and experience with server/network troubleshooting in complex infrastructures

Transferable Skills

- Leadership Skills, Efficient and Clear Communication with other leaders, Technical Product Training, Communicating and Coordinating with clients for project delivery and issues.

WORK EXPERIENCE**Seditio Asia**

Full Time(January 14, 2019 - Present)

Full Stack Web Developer, Client Relations, Network Support, and Product Trainer

- Developed team skills, and learned leadership skills between project developments. Currently trying to expand abilities as a developer and eagerness to step up into leadership.

Contact Number:

(032) 383 1944

FiveSigma

Freelance (March - November 2022)

Full Stack Web Developer

- Developed APIs in NodeJS, and integrated them in Funnelflex and Bigin Zoho. Also, managed wordpress websites and products.

PROJECTS

- **Sales Queue**

Seditio Asia (July 2025)

Technologies: **ReactJS, Laravel, SQL, OpenAI, Gemini**

- It is a demo leads generation platform for Sectorsift, which scrapes websites and uses OpenAI or Gemini to find and select leads to convert them into contacts based on the customers search criterias.

- **Sectorsift**

Seditio Asia (March 2024 - Present)

Technologies: **ReactJS, Laravel, SQL, Stripe, Zoho, Salesforce, Hubspot, OpenAI**

- It is an independent leads generation platform, which scrapes websites and uses OpenAI to find and select leads to convert them into contacts based on the customers search criterias.
- My role in this project is primarily being one of the primary software developers for this application development. So, I have my contributions in creating and integrating API endpoints to the frontend where I handle the events and actions. My second role in this project is Project and Task Management, I was given the role of managing and distributing tasks to my colleagues and being responsible for the deliveries of the project.

- **Jomalia Shipping Lines**

Seditio Asia (May 2023 - March 2024)

Technologies: **ReactJS, Laravel, SQL**

- A shipping line platform for managing vessels, users, schedules, tickets, and analytics and data presentation.
- Create and maintain API endpoints needed for business operations.
- Create a ticket management system for passengers and admin.
- Schedule and vessel management used in the ticketing system.
- Authentication and Role Management
- Product trainer

- **RPM (Remote Patient Management)**

Seditio Asia (September 2021 - December 2022)

Technologies: **HTML, CSS/SASS, Javascript/Jquery, PHP/Laravel, SQL**

- Manage patients and their devices, and create analytics using their readings received through an API from an external company. My role during the project was to manipulate the data received, create the analytics (tables, charts, displaying crucial data), external and internal API integration, and business logics.

- **Solas**

Seditio Asia (March 2021 - April 2021)

Technologies: **HTML, CSS/SASS, Javascript, PHP/Laravel/OctoberCMS**

- Create custom functions such as plugins and dynamic contents, analytics, and database management.

- **ManagedPMO**

Seditio Asia (January 2019 - Present)

Technologies: **HTML, SASS, Javascript/Jquery, PHP/Laravel, PWA, Python**

- Create the analytics, customize dynamic forms, real-time notifications, maps and directories, displaying data, progressive web apps that can be installed on mobile devices, and create functions for business logic needed for the operation.
- Developed desktop applications for NFC reader/writer.
- Setup server and devices for elevator and access controls for condominiums.
- Troubleshooting network devices for elevator controls for floor restrictions, and door restrictions.
- Coordinating with building engineers and property management officers for project delivery.

- **Doxa (Pixreview)**

Seditio Asia (2020-Present)

Technologies: **Jade/Pug, Laravel**

- This is a successful project that was made for an Irish client that will review all types of business in Ireland. We use a sentiment analysis which will filter out bad reviews and good reviews that are posted in Google Places and Facebook reviews and comments.
- Application Maintenance

- **Laundry POS**

Seditio Asia

Technologies: **HTML, CSS, Javascript, PHP**

- Data representation and analytics, and create functions for business logic.

- **FoodAI (Hackathon)**

Seditio Asia

Technologies: **PHP/Laravel, Facebook API**

- Send responses to specific accounts on facebook messenger using Laravel and Facebook's API.

- **RE Dynamics phase 1**

FiveSigma (2022)

Technologies: **App Scripts, Google form, Google spreadsheet**

- Scripts for google form to create new spreadsheets for different clients every time a form was submitted; using an existing template. Then color/label specific cells depending on the criteria submitted by the client.

- **RE Dynamics phase 2**

FiveSigma (2022)

Technologies: **Javascript, nodeJS/ExpressJS, Funnelflex, Bigin Zoho**

- Connect two different platforms using any backend/server-side application (I implemented the task using nodeJS with expressJS as its framework). The task was to manipulate records between two platforms (Funnelflex to Bigin Zoho) through their respective API and webhooks.
